Allowable Subject Matter

1. Claims 1-42 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The invention is directed to control reproduction of data in a reception apparatus, wherein a broadcast apparatus broadcasts an instruction to instruct the reception apparatus to switch reproduction between first data and second data. The closest prior arts, Meadows (U.S. Patent 3,975,583 A) discloses a television distribution system for interrupting the normal distribution of television signals and for enabling an emergency operator to present audio and video information to receivers serviced by the distribution system irrespective of the channel to which a receiver may be tuned; Malaure et al. (U.S. Patent 6,446,262 B1) disclose broadcasting repeatedly setup data on a broadcast carousel prior to a scheduled start time of the interactive application and status flag to the user interfaces to indicate that the setup data has been placed on the broadcast carousel; Ravi et al. (U.S. Patent 6,240,280 B1) disclose pausing media being listening and switching audio processor of a radio receiver over to the broadcast station transmitting the traffic announcement when detecting a traffic announcement; Manson et al. (U.S. Patent 6,543,051 B1) disclose a system for inputting an emergency alert message into a digital subscriber television system. Meadows, Malaure, Ravi, and Manson, either in singular or in combination, fail to teach or fairly suggest the following limitations: broadcasting a switch instruction for instructing the reception apparatus to stop reproducing the first broadcast data or the related additional data and start reproducing the second broadcast data or unrelated additional data when the broadcast of the first broadcast data or the scheduled program data is stopped as recited in claims 1, 16, 31, 34, 37, and 40; broadcasting a disable instruction for instructing the reception

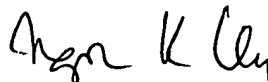

apparatus to refrain from switching reproduction from the second broadcast data or the unrelated additional data to the first broadcast data or the related additional data when the broadcast of the first broadcast data or the scheduled program data is stopped as recited in claims 11, 26, 33, 36, 39, and 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
